

Arrest of Huawei's Executive - US-China Tech Trade War

What is the issue?

\n\n

\n

- Canadian authorities recently arrested Huawei's global chief financial officer Meng Wanzhou on allegations of fraud levelled by the US.

\n

- It comes as a signal for the emerging high-tech trade war between the United States and China.

\n

\n\n

What is the charge against Meng?

\n\n

\n

- Meng is alleged to have tricked financial institutions into making transactions that violated US sanctions against Iran.

\n

- Between 2009 and 2014, Huawei used a Hong Kong company, Skycom Tech, to do business with telecom companies in Iran.

\n

- Huawei had tried to import US-made computer equipment there.

\n

- Banks in the US cleared transactions for Huawei, inadvertently doing business with Skycom.

\n

- When financial institutions asked Huawei about the allegations, Meng reportedly met with an executive from one institution.

\n

- He had said Huawei operated in Iran in compliance with US sanctions, and that it had sold its shares in Skycom.

\n

- But Canada alleges that Huawei operated Skycom as an unofficial subsidiary, making efforts to keep the connection secret.

\n

- Also, Meng's presentation to the financial institution constituted fraud.

\n

\n\n

\n

- Meng faces possible extradition to the US, a process that can take time.
- The arrest has led to China warning Canada and calling in the US Ambassador in Beijing to lodge its protest.

\n

\n\n

Is this the first time?

\n\n

\n

- Huawei is the second big Chinese tech company to be accused of breaching those sanctions.
- The first was ZTE Corp. in 2017.
- The US punished ZTE by forbidding it from buying American components, most importantly, telecom chips made by US-based Qualcomm Inc.
- Those restrictions were lifted after ZTE agreed to pay a fine.

\n

\n\n

Is it a trade war scenario?

\n\n

\n

- These episodes highlight Chinese companies' dependence on critical US technology.
- US moves against Huawei and ZTE may be intended to force China to remain a cheap supplier instead of a threatening competitor.
- More systematic efforts to block Chinese access to US components are in the works.
- E.g. the recently passed Export Control Reform Act
- It increased regulatory oversight of US exports of emerging and foundational technologies deemed to have national-security importance.
- A second weapon in the high-tech trade war is investment restrictions.

\n

- \n
- The Trump administration has greatly expanded its power to block Chinese investments in US technology companies.
- \n
- This is done through the Committee on Foreign Investment in the US (CFIUS) which has already cancelled a bunch of Chinese deals.
- \n
- The objective is to prevent Chinese companies from copying or stealing American ideas and technologies.
- \n
- By blocking these investors, the Trump administration hopes to preserve US technological dominance.
- \n
- The European Union is also moving to restrict Chinese investments, signalling the less-publicised high-tech trade war.
- \n

\n\n

How does the future look?

\n\n

- \n
- **Trade** - The high-tech trade war shows that for all the importance over manufacturing jobs, steel, autos and tariffs, the real competition is in the tech sector.
- \n
- Losing the lead in the global technology race means lower profits and a disappearing military advantage.
- \n
- So the US cannot afford to lose its dominance in the tech sector.
- \n
- With the coming of the high-tech trade war, China's economic co-dependency with the U.S. would come to an end.
- \n
- Investment restrictions may spur China to upgrade its own homegrown research and development capacity.
- \n
- **Relations** - It is very recently that the US and Chinese Presidents declared a 90-day “truce” in their trade war. Click [here](#) to know more.
- \n
- But the arrest in Canada of a Chinese telecom company executive signals a second US-China trade war.
- \n
- China sees the moves as a political play to create leverage on trade or

cripple Chinese technology companies.

\n

- This could potentially pose a challenge to the already difficult relationship.
