

Budget 2017 - Defense Expenditure & Reforms

Why in news?

\n\n

For defence expenditure excluding pensions, the budget has provided a sum of Rs.2,74,114 crore including Rs.86,488 crore for defence capital.

\n\n

What are the implications for defence expenditure?

\n\n

\n

- The budget estimate of defence pensions this year is Rs.86,000 crore i.e 1.6% of GDP - a drop from last year's low of 1.74% of GDP.

\n

- When the defence pensions is included, the overall defence budget amounts to Rs.3.59 trillion, or 2.1% of gross domestic product (GDP).

\n

- There is a nominal increase of 10% in the capital acquisitions.

\n

- But this is a net reduction in capital spending once you account for inflation and slashed expenditures in the revised estimate.

\n

- Around 90% of the expenditure is allocated to paying off instalments of money for past purchases of Sukhoi fighter craft, aircraft carrier Vikramaditya, transport planes like the C130J Super Hercules and more.

\n

- The available budget for future acquisitions will only be about Rs10,000 crore.

\n

- Outside of the budget, the government has done a fine job in liberalizing foreign direct investment (FDI) in defence, allowing up to 100% foreign ownership, with any **FDI up to 49% foreign ownership under the automatic route.**

\n

- This move was long overdue and a necessary step in providing competition to a moribund public defence production sector and avoiding

an excessively high defence import bill.

\n

- But with barely Rs10,000 crore allocated towards new capital acquisitions, Make-in-India-Defence might remain a slogan and nothing more.

\n

\n\n

What reforms can be done?

\n\n

\n

- The Indian Armed Forces (especially the Indian Army) is too person-heavy and needs some **force rationalization**.

\n

- Even China decided to reduce its troop size by 300,000 people in 2015.

\n

- Apart from this, the defence ministry needs **to urgently follow the railway ministry in adopting accrual accounting**.

\n

- It is evident that the true pension liabilities of the Indian Armed Forces are unknown.

\n

- Therefore the Armed Forces need a good calculation of their assets and liabilities to be prepared for future conflict.
