

Budget 2017 - Defense Expenditure & Reforms

Why in news?

 $n\n$

For defence expenditure excluding pensions, the budget has provided a sum of Rs.2,74,114 crore including Rs.86,488 crore for defence capital.

 $n\n$

What are the implications for defence expenditure?

 $n\n$

\n

- The budget estimate of defence pensions this year is Rs.86,000 crore i.e 1.6% of GDP a drop from last year's low of 1.74% of GDP.
- When the defence pensions is included, the overall defence budget amounts to Rs.3.59 trillion, or 2.1% of gross domestic product (GDP).
- But this is a net reduction in capital spending once you account for inflation and slashed expenditures in the revised estimate.
- Around 90% of the expenditure is allocated to paying off instalments of money for past purchases of Sukhoi fighter craft, aircraft carrier Vikramaditya, transport planes like the C130J Super Hercules and more.
- \bullet The available budget for future acquisitions will only be about Rs10,000 crore. $\ensuremath{^{\text{h}}}$
- Outside of the budget, the government has done a fine job in liberalizing foreign direct investment (FDI) in defence, allowing up to 100% foreign ownership, with any FDI up to 49% foreign ownership under the automatic route.

\n

• This move was long overdue and a necessary step in providing competition to a moribund public defence production sector and avoiding

an excessively high defence import bill.

\n

 But with barely Rs10,000 crore allocated towards new capital acquisitions, Make-in-India-Defence might remain a slogan and nothing more.

 $n\n$

What reforms can be done?

 $n\n$

۱n

• The Indian Armed Forces (especially the Indian Army) is too person-heavy and needs some **force rationalization**.

\n

\n

- \bullet Even China decided to reduce its troop size by 300,000 people in 2015. $\mbox{\ensuremath{^{h}}}$
- Apart from this, the defence ministry needs to urgently follow the railway ministry in adopting accrual accounting.
- It is evident that the true pension liabilities of the Indian Armed Forces are unknown.
- \bullet Therefore the Armed Forces need a good calculation of their assets and liabilities to be prepared for future conflict. $\$
