

Centre on GM mustard crop

Why in news?

\n\n

Indian government don't have any policy decision on the commercial release of Genetically Modified (GM) mustard crop.

\n\n

Why GM mustard is opposed?

\n\n

\n

- Hybrids are normally obtained by crossing two genetically diverse plants from the same species, but there is no natural hybridisation system in mustard.

\n

- The new technology for GM mustard has used a "Barnase" gene isolated from a soil bacterium.

\n

- The resultant hybrid mustard plant will be high-yielding.

\n

- This incorporation of alien genes led to the opposition.

\n

- This same technology has been used in GM cotton.

\n

- The opponents of GM mustard point out that cotton is not a food crop, while mustard is India's largest edible oil-yielding crop.

\n

\n\n

What is the status of its commercial release?

\n\n

\n

- The apex court had on October 17 last year gave the stay on the commercial release of GM mustard crop until further orders.

\n

- The court had asked the Centre to seek public opinion on such seeds before releasing it for cultivation purposes, even as government approval is awaited.

\n

- Recently, the Union government informed the Supreme Court that it has no policy decisions on GM mustard.

\n

\n\n

Why SC demands for a well-informed view on GM mustard?

\n\n

\n

- Mustard is one of India's most important winter crops, which is sown between mid-October and late-November.

\n

- The government sowing the seeds in various fields and the bio-safety dossier has to be put on the website, which has not been done yet.

\n

- The field trials were being carried out by the government without conducting the relevant tests.

\n

- The contamination of germ plasm will happen with mustard HT (Herbicide Tolerant) DMH 11, it will be irremediable and irreversible making our food toxic at the molecular level without recourse.

\n

- A Technical Expert Committee (TEC) report has pointed out that the entire regulatory system on GM mustard is a messes and a 10-year suspension should be given.

\n

\n\n

Quick fact

\n\n

Genetic engineering appraisal committee (GEAC)

\n\n

\n

- It is established under Ministry of Environment, Forests and Climate Change.

\n

- It is the apex body for approval of activities involving large scale use of hazardous microorganisms and recombinants.
\n
- It is also responsible for approval of proposals relating to release of genetically engineered organisms and products including experimental field trials.
\n

\n\n

Centre for Genetic Manipulation of Crop Plants (CGMCP)

\n\n

- \n
- It is a R&D setup of Delhi University.
\n
- It takes important researches on bio technology.
\n
- This centre developed many indigenous genetically modified seeds.
