

# Concerns with 'Start-Up India'

#### What is the issue?

 $n\n$ 

Fund allocations made under the Start-up India initiative show that the ambitious scheme is far from being a success.

 $n\n$ 

### What is the Start-Up India plan?

 $n\n$ 

\n

• The start-up fund of funds was launched some three years ago by the Prime Minister to help early-stage entrepreneurs.

۱n

- The objective was to create a lively ecosystem for entrepreneurs.
- It aimed at making allocations to start-ups to be routed through venture capital firms.

\n

 $n\$ 

## How has it performed?

 $n\n$ 

\n

• Despite the gaps, there is a growing number of unicorns (start-ups reaching a valuation of \$1 billion or above) in India.

\n

• Eight of them became unicorns in 2018, which was the highest addition in a single calendar.

۱'n

• India is the third-largest start-up destination with an estimated 7,700 tech start-ups.

\n

 $n\n$ 

### What does the recent estimate show?

\n

• The recent estimates on the scheme were given by the Small Industries Development Bank of India (SIDBI).

۱n

- SIDBI manages the fund of funds for the Start-up India.
- $\bullet$  It has so far committed Rs 1,900 crore, which is less than 20% of its Rs 10,000-crore corpus to venture capital firms.  $\$
- This is an indication that the government has fallen short on delivering its promise.

\n

 $n\n$ 

## What are the policy shortfalls?

 $n\n$ 

\n

- Not just Start-up India, other initiatives such as Make in India and Swachh Bharat have not been fully successful despite their potential.
- While business and politics often go hand in hand, schemes such as Start-up India should have had a clear vision and goal.
- For Start-up India, the focus should have been on nurturing innovation as well, rather than just on disbursing money.
- $\bullet$  The idea of just a money bag without any attention to innovation is out of sync with entrepreneurship.  $\ensuremath{\backslash} n$
- Besides this, the Central Board of Direct Taxes (CBDT) recently asked startups to pay the angel tax based on the valuation of firms.
- This has adversely hit the mood in the sector, despite assurance of no coercive action till the matter is looked into by an expert committee.
- $\bullet$  Also, the government proposal to stop cashback and deep discount sales by e-commerce firms has added to the overall gloom. \n
- $\bullet$  As large number of new start-ups could get into the e-commerce space, this decision acts against the spirit of entrepreneurship. \n

### How is it elsewhere?

 $n\n$ 

\n

• In other leading start-up destinations such as the UK, Israel and the US, institutional backing comes with the right focus on cutting-edge research and innovation.

\n

- $\bullet$  For instance, in the US, the federal government does not usually offer grants for starting or growing a business.  $\mbox{\sc h}$
- It, instead, plays an active role in technology development among other areas.

\n

 $\bullet$  In addition, business grants are available through state or local initiatives.  $\mbox{\ensuremath{\backslash}} n$ 

 $n\$ 

\n

- $\bullet$  Also, there are competitive awards-based programmes, encouraging small businesses to pursue R&D projects potential of commercialisation. \n
- $\bullet$  India should now make a revised assessment of the scheme to capitalise on its true potential.  $\ensuremath{\backslash n}$
