

## **Difficulties in tackling Insider Leaks**

### **Why in news?**

\n\n

\n

- Loan default disclosure information has been leaked by insiders.
- SEBI faces many challenges to pin down the original company insiders responsible for these leaks.

\n

\n\n

### **What is SEBI's Loan default disclosure?**

\n\n

\n

- SEBI required listed firms to inform exchanges if they default on loan payments to banks and financial institutions.
- By new definition SEBI made it clear, even a delay of one day from the due payment of loans will be considered as default.
- The move came against the backdrop of the government and the Reserve Bank of India (RBI) stepping up efforts to tackle the menace of bad loans amounting to over Rs. 8 lakh crore.

\n

\n\n

### **What was leak about?**

\n\n

\n

- Many price sensitive information relating to defaults of major companies listed in Indian stock exchange were been circulated in WhatsApp groups.
- This leak was happened prior to the public announcement of quarterly results.

\n

- According to Indian laws mere sharing of unpublished information is illegal and anyone possessing it is an 'insider'.  
\n
- Many insider analysts shared prescient tip-offs about upcoming results for top listed companies.  
\n
- On this regard SEBI has interrogated analysts, conducted raids on stock brokers and deployed search-and-seizure powers to confiscate laptops and mobile phones.  
\n

\n\n

### **What are the difficulties in addressing insider leaks?**

\n\n

- \n
- In this case, the leaks were already a few months old, and the WhatsApp messages were encrypted, which is tedious for the regulator to track.  
\n
- In India, this means breaking the cosy nexus between managements of listed companies and analysts who track them.  
\n
- It is a common practice for companies to host exclusive analyst conference calls immediately after key actions, where the management shares a detailed break-down of numbers and fields one-to-one questions.  
\n
- Going strictly by insider trading laws, the transcripts of all such interactions should be placed immediately in the public domain.  
\n
- But in practice, companies inordinately delay or even skip the filing, resulting in significant information asymmetry between the selected analysts and other public investors.  
\n
- India's premier stock exchanges are yet to deploy their tech and data-mining capabilities to address such leaks.
