

Digital Threat Report 2024

Prelims - Current events of national and international importance.

Mains (GS III) - Challenges to internal security through communication networks, role of media and social networking sites in internal security challenges, basics of cyber security; money-laundering and its prevention.

Why in News?

India launches first Digital Threat Report 2024 recently.

- **Aim** - To address the escalating cyber threats faced by financial institutions.
- **Launched by** - Ministry of Electronics and Information Technology.
- **Collaborated with** - CERT-In (MeitY), CSIRT-Fin and SISA, a global Cybersecurity company.
- It highlights the critical need for a cohesive cybersecurity framework to safeguard the nation's financial infrastructure.
- The report addresses
 - Illuminate Adversaries' Playbook
 - Anticipate Future Attacks
 - Assess the Impact of AI in Breaches
 - Recommend Preventive and Detective Controls
 - Highlight Current Trends and Select Cases
- **Anticipated Cyber Threats in 2025**
 - Rise of deep fakes and AI-generated content
 - Growing threat of supply chain attacks and malicious libraries
 - Emerging threat of LLM prompt hacking in applications
 - Influence of adversarial LLMs enhancing attack capabilities
 - Quantum computing - A looming threat to cryptography
 - Crypto - A new frontier for cyber threats
 - IOT, the emerging threats to embedded devices.
- **Suggestions to Policy Makers**
 - Cybersecurity should be a techno commercial business decision and not just decided only on commercials
 - Digital Payment Security to have common standards for all Digital Payment Form Factors
 - Clear Preparation Roadmap for Post Quantum Cryptography
 - Empower CISOs through direct reporting to the CEO/CRO instead of CTO or CIO
 - Create more Certified Digital Payment Security Specialists in the ecosystem
 - Building a Responsible AI Framework for BFSI
- The report calls on financial institutions, regulators, and security experts to take a proactive stance in addressing cyber threats.

- As AI-driven attacks become more prevalent and compliance demands grow increasingly complex, the necessity for strategic direction in managing the cybersecurity environment is important.
