

DNA Technology Regulation Bill, 2018

Why in news?

\n\n

Cabinet has approved the DNA Technology (Use and Application) Regulation Bill, 2018.

\n\n

What are the key provisions?

\n\n

\n

- The Bill provides for the mandatory accreditation and regulation of DNA laboratories.

\n

- It seeks to ensure that the DNA test results are reliable.

\n

- It also ensures that the data remain protected from misuse or abuse in terms of the privacy rights of citizens.

\n

- The Bill's provisions will enable the cross-matching between\n

\n

- i. persons who have been reported missing

\n

- ii. unidentified dead bodies

\n

- iii. victims in mass disasters

\n

\n

\n

- The government will set up DNA data banks across India to store profiles.

\n

- It imposes jail term of up to 3 years and a fine of up to Rs 1 lakh on those who leak the information stored in such facilities.

\n

- These banks will maintain a national database for identification of victims, accused, suspects, undertrials, missing persons and unidentified human remains.

\n

- The Bill creates a DNA Profiling Board that would be the final authority to -
\n

\n\n

\n

- i. authorise the creation of State-level DNA databanks
\n
- ii. approve the methods of collection
\n
- iii. analyse DNA-technologies
\n

\n\n

What is the objective?

\n\n

\n

- Forensic DNA profiling helps in offences categorized as affecting the human body and those against property.
\n
- It includes murder, rape, human trafficking, or grievous hurt and theft, burglary, dacoity.
\n
- National Crime Records Bureau (NCRB) put the number of such crimes in excess of 3 lakhs per year.
\n
- Of these, only a very small proportion is being subjected to DNA testing at present.
\n

\n\n

\n

- The primary purpose of the Bill is thus to expand the application of DNA-based forensic technologies.
\n

\n\n

\n

- The expanded use of DNA technology in these cases would result in speedier justice delivery.
\n
- It could also help in increased conviction rates, which at present is only around 30%.
