

# **Global Gender Gap Report 2018**

### Why in news?

 $n\n$ 

The Global Gender Gap Report 2018 was recently released by the World Economic Forum.

 $n\n$ 

#### What is the report on?

 $n\n$ 

\n

• The report maps the performance of different countries on an index that evaluates the parity among men and women.

\n

 $n\n$ 

\n

1. economic opportunity

\n

2. political empowerment

3. educational attainment

4. health and survival

 $n\n$ 

## What are the highlights?

 $n\n$ 

\n

• **India** has been ranked 108th in World Economic Forum (WEF) gender gap index, same as 2017.

۱n

• Growth - Being in 72nd place, India recorded improvement in wage equality

for similar work.

۱n

• It has also closed its tertiary education enrolment gender gap for the first time in 2018.

\n

 $n\n$ 

\n

• It has managed to keep its primary and secondary gaps closed for the third year running.

۱n

- India is also one of the countries that has done well on the political empowerment of women, ranking 20th.
- **Shortfalls** Gender gaps have worsened for India in 2 categories health and survival, economic participation and opportunity.
- India ranks 142nd out of 149 countries in the economic opportunity and participation subindex.

\n

 $n\n$ 

\n

- India needs to make improvements ranging from women's participation to getting more women into senior and professional roles.
- India continues to rank third-lowest in the world on health and survival.
- It remains the world's least-improved country on this subindex over the past decade.

\n

- $\bullet$  In fact, India actually widens the gender gap on this subindex this year.  $\ensuremath{\backslash n}$
- India has the second-largest artificial intelligence (AI) workforce, but it has one of the largest AI gender gaps, with only 22% of roles filled by women.  $\$

 $n\n$ 

# What is the global scenario?

 $n\n$ 

۱n

• The global list was topped by Iceland, having closed more than 85% of its overall gender gap.

\n

- Iceland holds the top spot in the index for the 10th consecutive year.
- Nordic countries dominated the top slots with Norway, Sweden and Finland in the 2nd, 3rd, and 4th places respectively.
- Other countries in the top-10 include Nicaragua, Rwanda, New Zealand, the Philippines, Ireland and Namibia.
- South Asia was the second-lowest ranking region in the index, with only 65% of its gender gap now closed.
- India is slightly ahead of the regional average having closed 66% gap.
- Overall, the world has closed 68% of its gender gap i.e. there is still a 32% average gender gap that remains to be closed.  $\$
- But this gender gap extends to over 77% when it comes to political empowerment and over 44% in relation to economic participation.
- At the current rate of change, the world will take 108 years to close the overall gender gap.
- $\bullet$  Also, it would take 202 years to bring about parity in the workplace.  $\ensuremath{^{\backslash n}}$

 $n\n$ 

# What does it imply?

 $n\n$ 

۱n

- Overall, political empowerment and economic participation are the two categories with maximum divergence in gender parity scores.
- $\bullet$  The economies that will succeed in the fourth industrial revolution will be those that are best able to harness all their available talent. \n
- $\bullet$  So proactive measures that support gender parity and social inclusion and address historical imbalances are therefore essential. \n
