

Highway Tiger killings

What is the issue?

\n\n

Wildlife Institute of India estimates that tigers in Indian reserves face destructive impact of roads and traffic.

\n\n

What is the recent incident?

\n\n

\n

- Bajirao, one of India's breeding tigers from the Bor reserve, was killed in a highway hit and run accident recently.

\n

- Bor Tiger Reserve is a wildlife sanctuary located in Wardha District of Maharashtra.

\n

- Bor Tiger Reserve is one among the 'Satellite core area', which gives special focus on tiger protection.

\n

- This incident highlights the absence of scientific advice to keep highways out of wildlife corridors.

\n

- Recent study in Kanha-Pench tiger reserve corridor in Maharashtra also found that a national highway could block flow of genes between regions.

\n

\n\n

What are the possible measures?

\n\n

\n

- The Centre and the National Highways Authority of India have been repeatedly advised to realign or modify sensitive roads.

\n

\n\n

\n

- The National Tiger Conservation Authority should insist on modification of existing roads to provide under tunnel crossings for animals.
- Users can be asked to pay a small price for the protection of vital environmental features.
- This would ensure that tigers and other animals are not isolated, and can disperse strong genetic traits to other populations.
- Curbs could be imposed on traffic on existing roads passing through sanctuaries.
- There could also be speed restraints and limitations like allowing only escorted convoys, with a ban on private vehicular movement at night.
