

## **Insolvency and Bankruptcy Code (Amendment) Bill 2017**

### **Why in news?**

\n\n

The Insolvency and Bankruptcy Code (Amendment) Bill 2017 was introduced in the Lok Sabha to replace an earlier ordinance.

\n\n

### **What was IBC, 2016?**

\n\n

\n

- The Insolvency and Bankruptcy Code (IBC) was enacted in 2016 to facilitate a time-bound resolution for ailing and sick firms.

\n

- It could either be through closure or revival, while protecting the interests of creditors.

\n

- Under IBC, either the creditor (banks) or the loaner (defaulter) can initiate insolvency proceedings.

\n

- It is done by submitting a plea to the adjudicating authority, in this case, the National Companies Law Tribunal (NCLT).

\n

- The resolution process was expected to aid in reducing the rising bad loans in the banking system.

\n

\n\n

### **What is the need for changes?**

\n\n

\n

- There was a concern that the resolution process could leave scope for the defaulters to take advantage of the situation.

\n

- Notably, the provisions allowed them to come back into the management by paying a fraction of the defaulted amount.

\n

- Addressing this, an ordinance was brought in later, which prevented unscrupulous promoters from misusing the provisions of the IBC.

\n

- It thus barred from participating in the resolution process, the following:

\n

\n\n

\n

- i. wilful defaulters

\n

- ii. defaulters whose dues had been classified as NPAs for more than a year

\n

- iii. all related entities of these firms

\n

\n\n

\n

- Consequently, many entities that acquired distressed assets were disqualified from the bidding process, as these were classified as NPAs.

\n

- Similarly, banks opting to convert their debt into equity under the RBI's restructuring scheme would have become promoters of these insolvent companies.

\n

- And hence these have also been barred from the resolution process.

\n

- These anomalies called for changes to make the debt resolution process easier and more efficient.

\n

\n\n

## **What are the highlight provisions of the bill?**

\n\n

\n

- The amendment bill will replace the earlier ordinance on the Insolvency and Bankruptcy Code.

\n

- It has addressed concerns about some of the stringent provisions in the ordinance and seeks to streamline the law and plug loopholes.

\n

- Accordingly, now, wilful defaulters and existing promoters can become eligible to **submit a resolution plan** if they repay their dues and make their

bad loans operational.

\n

- Also, defaulters who had participated in the insolvency proceedings before the enactment of the ordinance can also **bid for stressed assets** provided they clear their dues in a month.

\n

- Notably, these promoters were earlier barred from taking part in the resolution process of the companies.

\n

- It also allows guarantors of insolvent firms to bid for other firms under the insolvency process.

\n

- Further, asset reconstruction companies, alternative investment funds (AIFs) such as private equity funds and banks can now participate in the bidding process.

\n

- The bill thus seeks to strike a balance in the trade-off between punishing wilful defaulters and ensuring a more effective insolvency process.

\n

- The bill also seeks to bring any individual who was in control of the NPA under the ambit of the insolvency code.

\n

- It lays out that the individual insolvency law will be implemented in phases.

\n

\n\n

## What are the concerns?

\n\n

\n

- All bad loans may not be the result of wilful default, diversion or misappropriation of funds.

\n

- In a market driven economy, failure can be for various reasons.

\n

- These may include change in market conditions, severe competition, change in technology, change in government policies, etc.

\n

- The law thus does not recognize promoters facing genuine operational or financial difficulties because of external factors.

\n

- These factors for defaulting should also be recognised and resolutions provided for, to help bring the economy back on track.
