

International Monetary Fund (IMF) bailout

Why in news?

Recently Sri Lanka secured a \$3 billion bailout from the International Monetary Fund (IMF) amid the worst economic crisis.

What is IMF?

- **Establishment** - The IMF was established in 1944 in the aftermath of the Great Depression of the 1930s.
- **Aim** - To bring about international economic coordination to prevent competing currency devaluation by countries trying to promote their own exports.
- **Membership** - IMF has 190 countries as its members.
- **Headquarters** - Washington, D.C., United States.
- **Role** - IMF is the last resort lender for countries facing severe economic crises.
- The IMF fosters international financial stability by providing
 - Policy advice
 - Financial assistance
 - Capacity development
- IMF provides financial support to countries hit by crises in order to restore economic stability and growth.
- IMF does not lend for specific projects.
- **Resources of IMF** - IMF funds come from three sources
 - Member quotas
 - Multilateral borrowing agreements
 - Bilateral borrowing agreements

What is the IMF bailout?

- **Bailout** - Means extending support to an entity facing a threat of bankruptcy.
- **Lending** - The IMF lends money countries the form of Special Drawing Rights (SDRs)
 - Special Drawing Rights (SDRs) is a basket of five currencies, US dollar, Euro, Chinese Yuan, Japanese Yen and British Pound
- The bailout can be executed in the form of loans, cash, bonds, or stock purchases.
- **Reasons for bailout** - Countries seek IMF bailouts for the following reasons
 - To resolve macroeconomic risks
 - To solve currency crises
 - To meet external debt obligations
 - To buy essential imports
 - To push the exchange value of their currencies
- **Conditions** - The countries are expected to meet following conditions for the IMF

bailout
