

KALIA Scheme - Odisha

Why in news?

 $n\n$

The Odisha government recently launched the Krushak Assistance for Livelihood and Income Augmentation (KALIA) scheme.

 $n\n$

What does the scheme contain?

 $n\n$

\n

 KALIA stands for Krushak Assistance for Livelihood and Income Augmentation.

\n

• The scheme involves payments to encourage cultivation and associated activities.

\n

- \bullet The scheme will benefit 92% of the cultivators in the state and include every category from big farmers to landless cultivators. \n
- Under the scheme, all farmers in the state will be provided Rs 10,000 per family as assistance for cultivation.
- Each family will get Rs 5,000 separately in the kharif and rabi seasons, for five cropping seasons between 2018-19 and 2021-22.
- Since the scheme is <u>not linked to the amount of land owned</u>, it will greatly <u>benefit sharecroppers and cultivators</u>, most of whom own little or no land.
- Additionally, the scheme will assist the elderly, sick and differently-abled population who are unable to take up cultivation, by providing Rs 10,000 per household per year.

\n

• This is meant to be used for sustenance.

• However, this component will not be implemented immediately, as Odisha already offers free healthcare and disburses old-age pensions.

\n

• It also includes a <u>life insurance cover</u> of Rs 2 lakh and additional personal accident coverage of the same amount for 57 lakh households.

\n

• It further provides that crop loans up to Rs 50,000 are <u>interest-free</u>.

 $n\n$

How does the scheme benefits landless labourers?

 $n\n$

۱n

 The scheme targets 10 lakh landless households, and specifically SC and ST families.

\n

- They will be supported with a unit cost of Rs 12,500 for activities like goat rearing, mushroom cultivation, beekeeping, poultry farming and fishery.
- The beneficiary is encouraged to choose an activity with which he is familiar because these trades require some skill and network.
- The idea behind this is to identify an existing capacity of a beneficiary and build on it.

\n

• The government is also working on a skilling component to be added to this form of assistance.

\n

 $n\n$

How does the scheme makes targeted interventions?

 $n\n$

\n

- The scheme is going to be an <u>area-specific scheme</u> wherein an input support for a particular trade, say mushroom cultivation, will be provided if it is prevalent throughout that locality so that there is <u>aggregation of produce</u>.
- A critical trade like dairy production has deliberately been kept out of the scheme.

۱n

• This is because keeping a cow is more expensive, while milk production needs to have a collection route or agency that processes and refines this low shelf-life product.

\n

 On the other hand, poultry farming and fishery do not need a strong ecosystem to survive and has a ready market of consumption or cheap method of preservation.

\n

- Similarly, beekeeping is done by many self-help groups, so they are already familiar with the networks of that trade.
- \bullet Hence, activities like mushroom cultivation, poultry farming and beekeeping are covered under the scheme. \n

 $n\n$

How does the scheme differ from loan waiver?

 $n\n$

\n

- Unlike a loan waiver, through which banks appease a few farmers, KALIA's main targets are rural activities as a whole.
- The scheme will support <u>farming on a small scale</u> like sharecropping, fishing, animal herding, which are not covered under bank loans, but are caught in debt traps set up by local moneylenders.
- Also, a farm loan waiver will reduce credit available to farmers in the long term.

\n

 On the other hand, income support can be used to make a repayment or at least activate a bank account which can then receive a loan.
