

## Kumbakonam Vetrilai

Prelims: Current events of national and international importance

## Why in News?

The Kumbakonam vetrilai, or betel leaf, has recently been granted a Geographical Indication (GI) tag.

- Announced in April 2025.
- It is a heart-shaped leaf, key to making paan, which is an important cultural and agricultural symbol.
- **Growing areas** It is predominantly grown in Thanjavur's fertile Cauvery River basin, Tamil Nadu giving it a unique taste and aroma.
- Colour Dark to light green.
- **Harvest process** After 20–25 days of planting, *kolundhu vetrilai*, the first leaves emerge.
- The first-year harvest happens from the seventh to 12<sup>th</sup> month.
- It is called maaruvethalai, produces larger leaves with a better shelf life of six to seven days, and fetches higher prices in the market.
- Second and third-year yields *kelavethalai* and *kattavethalai* are smaller compared to the first year's yield.
- **Health Benefits** It aids digestion and is rich in antioxidants. They are high in chavicol, an anti-inflammatory compound that fights oxidative stress, common in conditions like diabetes
- This is Thanjavur's first agricultural GI tag.
