

North Korea's Denuclearisation

What is the issue?

\n\n

\n

- North Korea's upcoming meet with the US is expected to give a shape to its denuclearisation plan.

\n

\n\n

\n

- With its effort to gain the trust of world nations and remove the sanctions, a look at the means and probabilities become essential.

\n

\n\n

What is the recent meet on?

\n\n

\n

- North Korean leader Kim Jong-un and South Korean President Moon Jae-in met for the first time recently.

\n

- They have pledged to ensure peace, prosperity and unification of the Korean peninsula.

\n

- North Korea has already pledged to close one of its nuclear test sites.

\n

\n\n

What is the complexity?

\n\n

\n

- Differences between the two leaders on the question of denuclearisation are evident.

\n

- South Korea emphasised that complete denuclearisation was essential for

peace.

\n

- However, North Korea did not make its stance clear on this front.
- There was a clear indication of the need for equality between the two, during the talks.
- However, this equality is hard to be materialised in terms of nuclear security in the short term.

\n

\n\n

How have denuclearisations been?

\n\n

\n

- Denuclearisation is a key to the whole process, as it means different things to different people.
- For the U.S., the models are Iraq, Libya and the former republics of the Soviet Union.
- They all surrendered their nuclear assets in return for peace and normalisation.
- But North Korea seems to be opting for a different model.

\n

\n\n

What is North Korea's possible plan?

\n\n

\n

- **Recognition** - It much resembles the Indian model nuclear deal.
- Under this, it gets recognised as a “technologically advanced responsible state”.
- On the basis of this, it in turn gets certain strategic assurances.
- It is an effort to legitimise the nuclear arsenal and earn recognition as a responsible state.

\n

\n\n

\n

- **Credibility** - India arrived at the nuclear deal with the US by pointing to the direct nuclear threat from China and in turn from Pakistan.

\n

- Mr. Kim has gone further by suspending all missile tests and taking steps to shut down a nuclear test site.

\n

- This is much in line with earlier US 's demand to India to sign the Comprehensive Nuclear-Test-Ban Treaty to avoid sanctions.

\n

- **Relations with US** - Kim is also likely to use the Indian model to bargain for normal relations with the U.S.

\n

- This may be on the basis of guarantees such as:

\n

\n\n

\n

- i. minimum deterrence

\n

- ii. non-first use

\n

- iii. no tests

\n

- iv. commitment to nuclear disarmament in keeping with global developments, etc

\n

\n\n

Why is this model uncertain for North Korea?

\n\n

\n

- Trust and confidence in India as a responsible state and various other factors were behind the historic nuclear deal.

\n

- Unlike India, the track followed by the earlier North Korean leaders and the present one appeared in disorder.

\n

- This is ever since North Korea sought to leave the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) regime.

\n

- The posture was of threat and arrogance rather than peace or reconciliation.

\n

- It is now inclined to negotiate its way into removing sanctions and shaping

its future.

\n

\n\n

\n

- But the U.S. would be far more reluctant to make any concessions to North Korea without an agreement on denuclearisation.

\n

- The forthcoming negotiations will prove whether the Indian model will help North Korea in restoring peace.

\n

- Some amount of domestic reform at home, in terms of civil liberties, would help North Korea make its case better.
