

Pinaka Long Range Guided Rocket

Prelims: Current events of national and international importance | Science & Technology

Why in News?

The Defence Research and Development Organisation (DRDO) has successfully conducted the maiden flight test of the Pinaka Long Range Guided Rocket (LRGR-120) at the Integrated Test Range (ITR), Chandipur.

- LRGR-120 It is a *long-range, precision-guided rocket* for India's Pinaka Multi-Barrel Rocket Launcher (MBRL).
 - *Pinaka MLRS* is an indigenous, all-weather artillery system that can fire 12 rockets in under a minute.
- Maximum strike range Up to 120 km.
- Launcher Fired from existing Pinaka launchers, so no new platform was needed.
- **Developed by -** DRDO's Armament Research and Development Establishment (ARDE), Pune, and
- Supporting labs includes
 - High Energy Materials Research Laboratory (HEMRL)
 - Defence Research and Development Laboratory (DRDL)
 - Research Centre Imarat (RCI)
- Evolution of Pinaka Rocket -

Variant	Range	Guidance	Role
Mk-I	40 km	Unguided	Short-range artillery support
Mk-II	75 km	Unguided	Extended battlefield reach
LRGR-120	120 km	iPracigian-ailiada	Deep-strike, counter-force, stand-off capability

Key Features

- **Enhance accuracy** It is equipped with a guidance system that significantly improves accuracy.
- Guidance system A Combination of
 - Inertial navigation,
 - With mid-course updates and
 - Terminal correction,

- Reducing circular error probable (CEP) compared to earlier variants.
- **Targets** Capable of engaging enemy artillery positions, command nodes, and logistics installations at long distances.
- **Stand-off Strike Capability** The system lets the Army strike targets from a safe distance, keeping the launch units protected.
- Precision This rocket achieved textbook accuracy, validating its guidance system.
- **Operational Deployment** It is intended for deployment across artillery regiments operating the Pinaka system.
- **Strategic significance** It provides the Indian Army with a *cost-effective, rapid-deployment alternative* to missiles for deep-strike operations.
