Section 124a of IPC

 $n\n$

\n

 Law Commission of India has recently recommended to the Government of India to re-think or even repeal the provision of sedition (Section 124A) from the Indian Penal Code.

\n

- Section 124a, commonly known as Sedition law made words or any visible representation that attempts to bring hatred or contempt or excite disaffection towards the government punishable by law.
- They shall be charged with cognizable and non-bailable offence with punishment up to imprisonment for life & fine or imprisonment for 3 years & fine or with fine alone.

۱n

- \bullet The expression disaffection includes disloyalty and all feelings of enmity.
- It was introduced in the 1870s, originally to deal with increasing Wahabi activities that posed a challenge to the colonial government.
- The section has been misused in recent times to suppress even minor dissent.

\n

 Non-bailable offence – The police cannot release anyone on bail and so the arrested person must make an application for bail before a magistrate or court.

Leptospirosis

 $n\n$

\n

• Health Department has recently given the warning about leptospirosis disease in the post-flood period.

۱n

• Leptospirosis is a bacterial infection in rodents and other wild and domesticated species.

\n

• It is a zoonotic disease (i.e) spread from animals to humans caused by bacteria of the genus Leptospira.

• It is transmitted to humans by exposure through water contaminated by urine from infected animals.

\n

• The infection in man is contracted through skin abrasions and the mucosa of the nose, mouth and eyes.

۱n

• Human-to-human transmission is rare.

\n

• In most of the cases, leptospirosis only causes mild flu-like symptoms, such as headache, chills and muscle pain.

\n

• However, in some cases the infection is more severe and can cause lifethreatening problems, including organ failure and internal bleeding.

۱n

 \bullet Severe form of leptospirosis is known as Weil's disease $\ensuremath{\backslash n}$

• It is an emerging tropical infectious disease.

• Without treatment, Leptospirosis can lead to kidney damage, meningitis, liver failure, respiratory distress, and even death.

Monster Galaxy

 $n\n$

\n

- Astronomers have captured the clearest image of Monster galaxy using Atacama Large Millimeter/submillimeter Array (ALMA).
- The monster galaxy called as COSMOS-AzTEC-1 is located 12.4 billion light-years away.

\n

- Monster galaxies, or starburst galaxies, form stars at a startling pace, 1000 times higher than the star formation rate in Milky Way Galaxy.
- It has molecular clouds that are highly unstable and leads to runaway star formation.

\n

• They are thought to be the ancestors of the huge elliptical galaxies in Universe.

\n

• Therefore, these findings pave the way to understand the formation and evolution of such galaxies.
