- Regulating them like commodities and clarifying their tax treatment is a win-win.
- The government's tax revenues go up. It can also increase the number of tax filers and the number of taxpayers.
- **Sidestepping current regulations** Some crypto assets may allow individuals to bypass securities issuance laws A potential risk to capital markets.
- Crypto assets may be used to avoid capital controls A potential risk to macroeconomic stability.
- If crypto holders have to declare their holdings above a particular level in their tax forms, such concerns can be mitigated.
