

Revamping India-Nepal ties

Why in news?

\n\n

Nepal PM is about to visit India.

\n\n

What is the situation in Nepal?

\n\n

\n

- Nepal made a transition from monarchy to republic in 2006.
- Since then, there has been one of uncertainty with the country seeing almost 9 PMs being appointed in as many years.
- This has ruined the economy and paralysed the functioning of the government.
- The process of drafting a new constitution dragged for long for lack of consensus on critical issues.

\n

\n\n

What has been India's Nepal policy?

\n\n

\n

- India played a critical role in bringing the Maoist insurgency in Nepal to an end in 2006.
- In the period thereafter, India was alleged of micro-meddling in Nepal's internal affairs.
- Ex: New provincial boundaries were attempted to be demarcated according to Indian interests on behalf of the people of the plains (Madeshis & Janajathis).

\n

- The border blockade in the Terai region in 2016, was also suspected to have the support of India.
\n
- This attitude of interventionism has backfired of late and hence calls for a course correction.
\n

\n\n

- **Chinese Influence** -Following the 2015 earthquake, Nepal increasingly looked towards China for assistance.
\n
- It is also now better connected to China through air & other intellectual forums than to India.
\n
- The Nepal PM's upcoming visit is an opportunity to set things right.
\n

\n\n

What are the areas of possible co-operation?

\n\n

- **Flood Management** -Flooding in the Nepal plains that have also affected downstream areas across the border needs to be addressed.
\n
- The Kosi Barrage and attendant embankments have the possibility of wreaking havoc because siltation of six decades has raised the riverbed within the levees far above the outlying tracts.
\n
- While it is easy to demand a high dam in the hills of Nepal, it is important to study the other ecologically & socially sustainable alternatives.
\n
- **Power Purchase** - Nepal has since long planned to sell electricity to India once it has a hydropower surplus.
\n
- But the Indian government has directed that it will not allow import of electricity other than from power companies with more than 51% Indian equity.
\n
- This has to be reviewed.
\n
- **Monetary & Financial Issues** - Demonetisation and GST have affected Nepal's economy.

\n

- Assistance is to be provided for better adaptation.

\n

- **Border Management** - There are border disputes pending between the two countries at Susta, Kalapani, and the 'tri-junction' of Lipulekh is another delicate point.

\n

- The arbitrary blockages and the selective use of quarantine for the export of Nepali agricultural produce are issues of concern.

\n

- A robust border management regime needs to be commissioned.

\n

- **Migrant Rights** - The rights of migrant labours in both the countries is a topic that rarely comes up but could potentially get sensitive in future.

\n

- Increasing high-handedness of the Sashastra Seema Bal (India's frontier force in this sector) in dealing with Nepalese crossing the border needs to change.
