

## SC Verdict in Cauvery River Water Dispute

### Why in news?

\n\n

The Supreme Court has pronounced its verdict on the sharing of Cauvery water among Tamil Nadu, Puducherry, Karnataka and Kerala.

\n\n

### How did the Cauvery dispute emerge?

\n\n

\n

- **Historically**, Tamil Nadu used about 602 TMC of the total yield of the river i.e. the available water in a particular year.

\n

- As a result, only about 138 TMC was available for Karnataka until the turn of the 20th century.

\n

- In **1924**, Tamil Nadu built the Mettur dam across the Cauvery river.

\n

- Subsequently, Karnataka and Tamil Nadu signed an agreement effective for 50 years.

\n

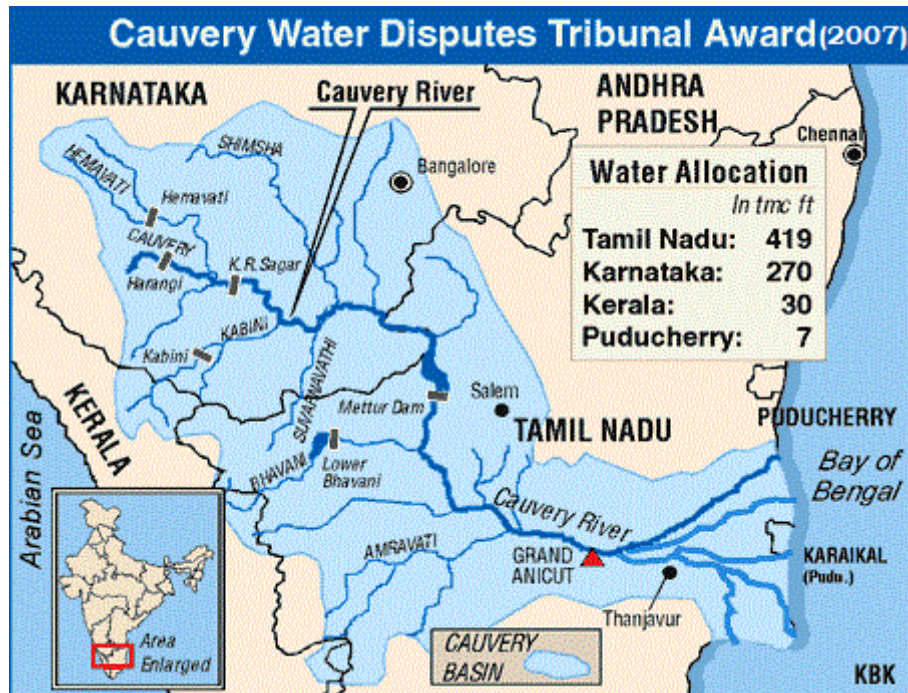

- Accordingly, Tamil Nadu was allowed to expand its agricultural area by 11 lakh acres from the existing 16 lakh acres.

\n

- Karnataka was authorised to increase its irrigation area from 3 lakh acres to 10 lakh acres.

\n

\n\n

\n\n

\n

- The Cauvery River thus primarily served the needs of farmers in Tamil Nadu.

\n

- On completing 50 years, the **accord lapsed in 1974**.

\n

- Subsequently, Karnataka claimed that the agreement restricted its ability to develop farming activities along the Cauvery basin.

\n

- To make up the lost ground, **Karnataka** attempted to **expand farming activities** in the Cauvery basin.

\n

- It started building reservoirs.

\n

- With this, the Cauvery river water sharing issue emerged.

\n

- It is now a major water sharing dispute among Tamil Nadu, Karnataka, Puducherry and Kerala.

\n

- **Tribunal** - By Tamil Nadu's demand, the Union government formed the Cauvery Water Disputes Tribunal (CWDT) in 1990.

\n

- The dispute was adjudicated by the CWDT in 2007.

\n

\n\n

**What was the Tribunal's order?**

\n\n

\n

- According to the tribunal's order, the total availability of water in the 802-km long Cauvery basin is 740 tmc in a normal year.

\n

- Of the total 740 thousand million cubic feet (TMC) of water available for utilisation -

\n

\n\n

\n

- i. 419 TMC was awarded to Tamil Nadu

\n

- ii. 270 TMC to Karnataka

\n

- iii. 30 TMC to Kerala

\n

- iv. 7 TMC to Puducherry

\n

\n\n

\n

- The remaining 14 TMC was reserved for environmental protection.

\n

- To achieve this sharing, the order stated that **Karnataka must release 192 TMC of water from Biligundlu Station** (inter-state dam) in normal monsoon years.

\n

\n\n

\n\n

- \n
- This should be at the rates specified by the tribunal for each month.
- \n
- The tribunal also noted that in case the yield was less in a distress year, the allocated shares shall be proportionately reduced.
- \n

\n\n

### **What was the response?**

\n\n

- \n
- Both Tamil Nadu and Karnataka challenged the tribunal's order.
- \n
- Karnataka claimed 312 TMC of water as against the 270 TMC ordered by the tribunal.
- \n
- The court reserved its order in September 2017.
- \n

\n\n

### **What is the present SC verdict?**

\n\n

- \n
- The Court declared Cauvery a "national asset".
- \n
- It upheld the principle of equitable apportionment of inter-State river water among riparian States.
- \n
- The judgment concluded that the CWDT did not take into account Tamil Nadu's stock of an "empirical" 20 TMC of ground water.
- \n
- Accordingly, Karnataka is "entitled to marginal relief".
- \n
- In its present verdict, the Supreme Court has thus reduced the allocation of Cauvery water from Karnataka to Tamil Nadu.
- \n

\n\n

State	Quantity of water allocated <b>(Latest)</b>
Karnataka	284.75 tmcft, including 4.75 tmcft for Bengaluru
Tamil Nadu	404.25 tmcft
Kerala	30 tmcft
Puducherry	7 tmcft

\n\n

\n

- This means a reduction of 14.75 TMC quota of Cauvery water to Tamil Nadu from the earlier 192 TMC as stipulated by the tribunal.

\n

- This change will be adjusted from the Biligundlu site.

\n

- Karnataka will now release only 177.25 TMC Cauvery water from Billigundlu site to Mettur dam in Tamil Nadu.

\n

- The SC has given the Centre 6 weeks to frame a scheme to make sure the final decisions are implemented.

\n

- SC has also directed the formation of the **Cauvery Management Board (CMB)** immediately.

\n

- \n

CMB will be an inter-state forum which will work to ensure the implementation of orders of the CWDT.

\n

\n

- \n

The Board shall be under the control of the Ministry of Water Resources.

\n

\n

- \n

The members of the Board will include a Chairman, two full-time members, and representatives of the central government and each of the four states.

\n

\n

- \n

The expenses of the Board will be borne by the state governments.
