

Solomon Islands

Prelims: Current events of national and international importance | World Geography

Why in News?

Recently, a 6.7-Magnitude earthquake hits Solomon Islands' Kirakira.

- Solomon Islands is an independent nation in the **South Pacific**, part of Oceania.
- **Capital** - Honiara on Guadalcanal, situated along the Mataniko River.
- **Independence**- Gained from the **United Kingdom in 1978**.
- **Climate** - Tropical, with mountainous, heavily forested terrain.
- **Highest Point** - The highest point is Mount Popomanaseu on Guadalcanal, reaching 2,332 meters.
- It is an archipelago of nearly 1,000 volcanic islands and coral atolls located east of Papua New Guinea and northwest of Vanuatu.
- **Atolls and Lagoons** - The country is home to the **Marovo Lagoon** in New Georgia, one of the world's largest saltwater lagoons, and Ontong Java, one of the largest atolls on Earth.
- **Archipelago**- Comprises 992 islands, including 6 large volcanic islands (Guadalcanal, Choiseul, New Georgia, Santa Isabel, Malaita, and Makira).
- **The Coral Triangle** - The western islands sit within the Coral Triangle, the global center of marine biodiversity.
- **Tectonic Activity** - The geography is defined by its position on the boundary of the Pacific and Australian tectonic plates.
- **Lifestyle** - Largely rural (90% outside urban areas) with a subsistence economy.
- **Currency** - Solomon Islands dollar (SBD).
- **Economy** - Often called the **"land of gold,"** with active Chinese-funded gold prospecting.
- **Renowned sites** - Renowned for diving, WWII sites, and diverse culture (93% Melanesian).
- **Geopolitics** - As of early 2026, the nation is in a state of "economic and

strategic turmoil" with increased security concerns, including a controversial, recently established temporary police post funded by a Chinese community organization.
