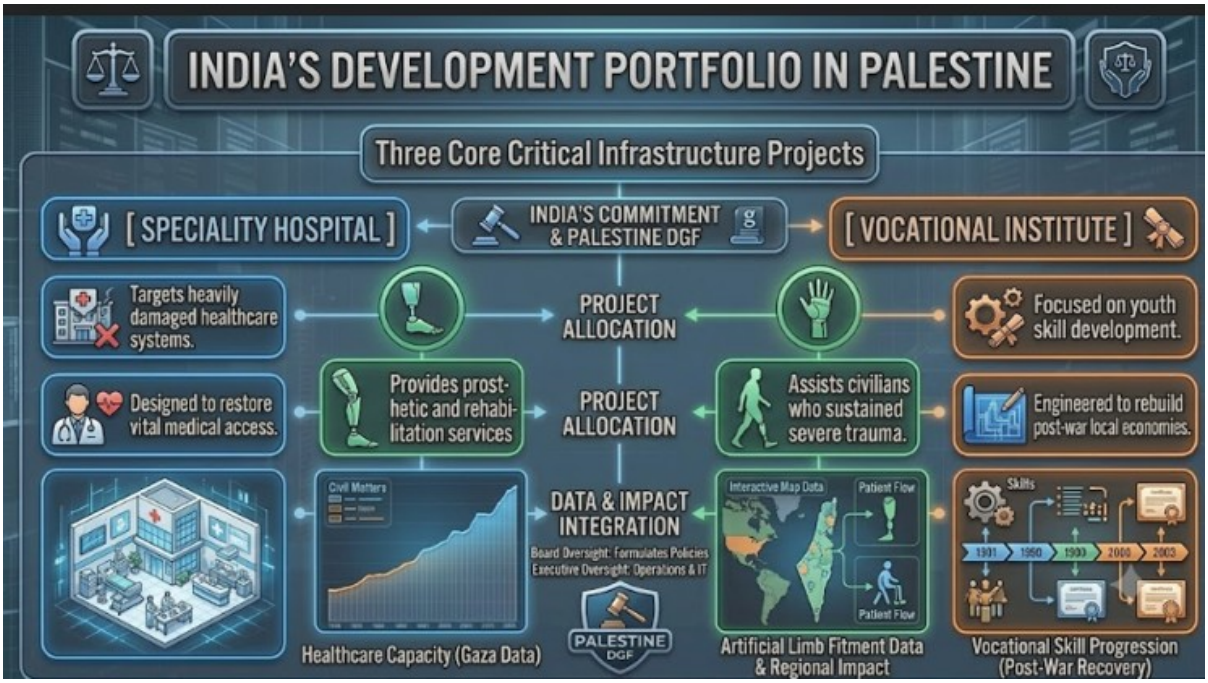
Three development projects to Palestine by India

Prelims: *Current events of national and international importance | Bilateral Ties*

Why in News?

The State of Palestine has formally welcomed India's announcement of three critical development projects earmarked for the Palestinian people.

The 3 Core Development Projects



- **Speciality Hospital -** Aimed at strengthening a heavily compromised healthcare network where critical medical facilities, equipment, and essential pharmaceuticals remain severely depleted.
- **Artificial Limb Fitment Centre -** Specially designed to provide urgent long-term medical care, prosthetic services, and comprehensive physical rehabilitation for thousands of Palestinians who have lost limbs during military campaigns.
- **Vocational Training Institute -** Intended to invest directly in human capital by equipping young Palestinians with specialized technical skills

necessary to rebuild local communities and revive the broader economy.
