

Trump Precarious Position

Who is the issue?

\n\n

\n

- Recently, U.S. President Trump's two key aides during the 2016 presidential polls were implicated by the FBI for misconduct.

\n

- While these would generate a political storm, it would amount to little more than that, Trump is insulated from prosecutions.

\n

\n\n

What are the implications of these developments?

\n\n

\n

- Trump's lawyer Michael Cohen pleaded guilty for violating campaign finance laws by paying a settlement to two women, to enhance Trump's chances.

\n

- Notably, the women were allegedly paid on the direction of Trump himself for staying silent on their sexual encounters with him.

\n

- On the very same day, Trump's former campaign chairman Paul Manafort was convicted of bank and tax frauds.

\n

\n\n

\n

- **Legal** - United States Justice Department has long held that a President cannot be charged with a crime as long as he holds office.

\n

- The Justice Department's line hasn't yet been challenged in court, and a prosecutor can in theory go ahead, ignoring the Department's position.

\n

- However, there is little movement in that direction as no person seems to have taken steps in that direction.

\n

- In this context, it is to be noted that Manafort's criminal conviction does not

directly implicate Trump too and the President has stated the same.

\n

- **Political** - With legal proceedings ruled out, impeachment is the only possibility to hold Trump accountable for his violations.

\n

- The removal of Trump from office has long been discussed, and the recent developments can spark calls for impeachment hearings.

\n

- But it is unlikely Congress would go down that road as long as Republicans are in a majority and even Democrats aren't unanimous in their views.

\n

\n\n

\n

- Pressure on Democrats to commit to begin impeachment proceedings if they take the House later in the year is likely to go up.

\n

- But apart from the mere symbolism of introducing impeachment, Trump will the recent courtroom developments will account to nothing more.

\n

- Notably, for impeachment to be passed, both chambers of the U.S. congress has to pass it with two-third majority of the total numbers in both houses.
