

UNEP's Champions of the Earth award

Prelims: Current events of national and international importance | Environment

Why in news?

Recently, the United Nation Environment Programme's Champions of the Earth award for the year 2025 was announced.

- **Launched in** - 2005
- It is the ***UN's highest environmental honor*** which celebrates leaders from public, private, and civil society sectors.
- **Focus** - Tackling the ***triple planetary crisis*** - climate change, biodiversity loss, and pollution.
- Past honorees include scientists, policymakers, grassroots activists, and entrepreneurs who have reshaped environmental governance.
- **5 categories** -
 - Lifetime Achievement
 - Policy Leadership
 - Action and Inspiration
 - Entrepreneurial Vision
 - Science and Innovation

Winners of 2025

Laureate	Category	Reason for Recognition
Imazon (Brazilian research institute)	Science and Innovation	Developed AI-driven geospatial tools to monitor and curb deforestation, advancing forest protection and biodiversity conservation.
Manfredi Caltagirone	Lifetime Achievement	Championed transparency and science-based action on methane emissions , influenced the EU's first methane regulation, and shaped global energy policy.

Mariam Issoufou (Architect)	Entrepreneurial Vision	Redefined sustainable, climate-resilient buildings by grounding architecture in local materials and cultural heritage, promoting eco-friendly urban design.
Pacific Island Students Fighting Climate Change (Youth-led NGO)	Policy Leadership	Secured a landmark advisory opinion from the International Court of Justice (ICJ) affirming states' legal obligations to prevent climate harm and protect human rights.
Supriya Sahu (India, IAS Officer)	Inspiration and Action	Led initiatives in sustainable cooling, ecosystem restoration , plastic waste management, and wildlife conservation, creating 2.5 million green jobs and expanding forest cover in Tamil Nadu. Also fighting climate change, adapting to its effects, and dealing with extreme heat. Her projects have shown that by combining good government, natural methods, and both simple (low-tech) and advanced (high-tech) tools , we can protect people who are at risk while also cutting down on pollution that causes global warming .

Previous Indian Winners includes -
