Brucellosis

Why in News?

An 8-year-old girl from Kottakkal in Malappuram district of Kerala died at the Government Medical College Hospital, Kozhikode, recently after undergoing around two months of treatment for brucellosis.

- It is a bacterial infection caused by the consumption of **unpasteurized milk**.
- **Caused by** - Various Brucella species.
- It is also known as undulant fever, Mediterranean fever, Malta fever
- It mainly infects cattle, swine, goats, sheep and dogs.
- **Transmission** - Humans acquire it through direct contact with infected animals, by eating or drinking contaminated animal products or by inhaling airborne agents.
- Most cases are caused by ingesting unpasteurized milk or cheese from infected goats or sheep. Human-to-human transmission is **very rare**.
- **Symptoms** - Fever, weakness, weight loss, and general a feeling of discomfort. In many patients, they can be mild and may not get diagnosed at all.
- **Incubation Period** - It can vary from one week to two months, but it usually lasts between two and four weeks.
- **Vulnerable age group** - It affects people of all ages. Transmission primarily affects farmers, butchers, hunters, veterinarians and laboratory personnel.
- **Treatment** - Treatment options include taking doxycycline 100 mg tablets twice a day for 45 days, and streptomycin 1 g daily for 15 days as per the advice of the doctors.
- **Prevention** - Vaccination of cattle, goats and sheep is among the prevention options.
- Pasteurisation of milk for direct consumption and for creating derivatives such as cheese is an important step to prevent its transmission from animals to humans.

Rare Diseases in India

Why in News?

Recently, a 19-year-old child actress, Suhani Bhatnagar, died due to dermatomyositis, a rare disease

Dermatomyositis

- It is an **uncommon inflammatory** disease marked by muscle weakness and a

distinctive skin rash.

- The condition can affect adults and children, affects more females than males.
- There's **no cure** for dermatomyositis.

Rare disease

- A disease is considered rare if it affects fewer than 200,000 people in the U.S. and fewer than 1 in 10,000 people in the European Union.
- **Definition** - According to WHO, Rare disease is a lifelong disease with a prevalence of 10 or fewer per 10,000 population.
- According to Organization of Rare Diseases India (ORDI) defined rare disease as a disease when it affects 1 in 5,000 people.

Rare Disease Day was observed on the last day of February i.e., 28th February (or 29 in leap years).

- **Spread** - It affect approximately 3.5% to 5.9% of the population.
- **Causes** - 72% of rare diseases are genetic, with over 7000 characterized by diverse disorders and symptoms.

Status in India

- India lacks a standard definition for rare diseases.
- Estimate suggests that about 8 crore-10 crore Indians suffer from one rare disease or another, over 75% are children.
- India accounts for one-third of the global rare disease incidence, with over 450 identified diseases.
- These range from widely known ones such as Spinal Muscular Atrophy and Gaucher's disease to lesser-known ones such as Mucopolysaccharidosis type 1 and Whipple's disease.
- **Centres of Excellence** - They are institutions identified by the central government under the National Policy for Rare Diseases (NPRD), 2021.
- **Aim** - To treat patients suffering from rare diseases actively.
- Currently, **63 rare diseases** are included under NPRD on recommendation of Central Technical Committee for Rare Diseases (CTCRD).

Anti-conversion Bill, Rajasthan

Why in News?

The Rajasthan Prohibition of Unlawful Conversion of Religion Bill, 2025 was introduced in the ongoing Budget Session of the state Assembly recently.

- **Provisions of the bill** - Religious conversion by misrepresentation, force, undue

influence, coercion, allurement or by any fraudulent means or by marriage has been made an offence in the Bill.

- The offence under the anti-conversion bill will be ***cognisable and non-bailable*** and triable by a court.
- Individuals who desire to convert their religion are required to give a declaration in the prescribed form ***at least 60 days*** in advance to the District Magistrate.
- The burden of proof that a religious conversion was not done through unlawful means rests on the person who has "caused" the conversion.
- The court may grant appropriate compensation to victims of unlawful conversion, which may extend to a maximum of ***₹5 lakh***.
- Repeat offenders may face double the punishment provided under the law for each subsequent offense.
- Marriages done for the sole purpose of conversion will be deemed invalid by family courts.
- **Punishment and penalties** - The Bill provisions imprisonment for a term not less than one year.
 - It may extend to 5 years with a fine of Rs 15,000.
- Those who violate the rules in respect of a minor, a woman or a person belonging to the Scheduled Caste or Scheduled Tribe shall be punished with imprisonment for a term of 2 years.
 - It may extend to 10 years along with a fine of Rs 25,000.
- In case of ***mass conversion***, the bill provisions 3 years of jail extending up to 10 years and a fine of Rs 50,000.
- Marriages done for the sole purpose of conversion will be deemed ***invalid*** by family courts.
- Once passed, Rajasthan will become the ***12th state*** to have an anti-conversion law.
- **Other states having anti-conversion law**
 - Odisha, Arunachal Pradesh, Gujarat, Chhattisgarh, Karnataka, Jharkhand, Haryana, Uttarakhand, Himachal Pradesh, Uttar Pradesh and Madhya Pradesh.
