

Women Empowerment - Political Sphere

The inclusion of all sections of the society in the public sphere is critically important for any democracy. India has a mixed track record when it comes to women's participation and representation in politics.

\n\n

What are the political rights of women?

\n\n

\n

- **Women were given equal vote the day India became Independent**, something that took the UK and the United States 100 and 144 years, respectively, to achieve.

\n

- India has also produced a number of powerful and consequential women politicians — more than most democracies — that have held, and still hold power, at the highest levels in state and national politics.

\n

- **The 73rd constitutional amendment ensures, by reserving seats for women in the panchayat system**, that at least a third of India's 3.2 million elected representatives are women (the 33% quota was raised to 50% in 2009).

\n

- Several states have since introduced gender parity in representation in municipal bodies.

\n

\n\n

Do these rights ensure gender parity?

\n\n

\n

- **The right to vote, in itself, is insufficient to guarantee gender parity** in voting.

\n

- The EC survey revealed that **concern for personal security**, dependence on the approval of family elders, and lack of adequate toilet facilities were some of the reasons that kept many women away from voting.

\n

- During the first two decades after Independence, women's participation in elections lagged behind that of men's by nearly 20 points.

\n

- In the recent years, women's participation has caught up with the average, to the point that in the last round of elections to state assemblies, **women outvoted men in 17 states.**

\n

\n\n

What is the contribution of Election Commission?

\n\n

\n

- The Election Commission (EC) has to be credited for a part of that success since it has improved the conduct of elections in ways that encourage women's participation.

\n

- The **improvement of electoral rolls, provision of separate queues for women voters, and making the polling process secure** after 1996 have gone a long way in making voting easier and safer for women.

\n

- Since 2006, the EC has prohibited the publication of voters' photographs in the electoral rolls, barring a small stamp size photograph in the hard copy distributed to political parties.

\n

- In Uttar Pradesh, during the 2012 elections, the EC decided to allow two women to proceed in the polling booth for every male voter who cast his vote. This was done **to quicken the voting process for women.**

\n

- Voting conditions for women have also improved, notably by the **compulsory presence of female polling staff members.**

\n

- Women police forces are also deployed with the view to encourage female voters.

\n

- The EC rolled out a comprehensive voter education drive to directly encourage women to vote.

\n

\n\n

What are the impacts?

\n\n

- \n
- There is gender parity in voter turnout in most states is remarkable.
- \n
- The fact that women outvote men in many states where their literacy rate is lower than the average must also be noted.
- \n
- In the 2014 general elections, women turnout rose from 55.82% to 65.63%, a jump of nearly ten percentage points.
- \n

\n\n

Are Women adequately represented in elected assemblies?

\n\n

- \n
- In spite of such progress, women's representation in elected assemblies remains **abysmally low**.
- \n
- In 1952, women comprised 6% of India's first Lok Sabha. Sixty two years later, the representation of women in the Lok Sabha in 2014 reached an all-time high of **12.15%**.
- \n
- The situation is **worse at the state level**, where the average representation ratio of women is only 7.3%.
- \n
- Some states, Nagaland or Mizoram for example, have no women MLAs. The worst performers are Jammu and Kashmir (2.27%) Goa (2.5%) and Karnataka (2.65%).
- \n
- India's best performing state is Haryana (14.44%), followed by West Bengal (13.95%), Rajasthan (13.48%) and Bihar (11%).
- \n

\n\n

What is the way ahead?

\n\n

- \n
- The greatest obstacle women face are the political parties, who refuse to field a fair number of women candidates.
- \n
- Their reservations like women make weaker, less winnable candidates could easily be addressed by passing the **Women's Reservation Bill**, which was introduced for the third time in 2008 and lapsed for the third time in 2014.

\n

- Changing prejudices and stereotypes in India will remain a herculean task for generations to come.

\n

- The only way to address it in the short run is through a **bold legislation**.
