2) Which among the following is the reason why "Suzetrigne", a recently approved Pain killer, is considered a safer alternative to opioids?

- a. It is a plant-based drug.
- b. It completely eliminates pain permanently.
- c. It does not produce euphoria or pleasure, reducing addiction risk.
- d. It is a more potent painkiller than opioids.

Answer : c

Suzetrigne:

- Recently, the United States Food and Drug Administration approved a new type of non-opioid painkiller called suzetrigne.
- Opioids are a class of drugs that derive from, or mimic, natural substances found in the opium poppy plant.
- Unlike opioids, which numb the sensation of pain in the brain, suzetrigne works by targeting pain signals before they reach the brain.
- Prescription opioids are primarily used for pain relief, but they are quite addictive.
- Experts believe that Suzetrigne is considered a safer alternative to opioids because it does not produce any sensation of pleasure or euphoria. Also, the drug could not create addiction or dependence among users. **(Option (c) is correct)**
