

Daily Current Affairs Prelims Quiz 23-06-2025 (Online Prelims Test)

1) When a suspected mobile number is flagged under the FRI system, how is it classified?

- a. Low, Medium, or High risk
- b. Red, Amber, or Green risk
- c. Medium, High, or Very High financial risk
- d. Verified, Under Review, or Fraudulent

Answer : c

Explanation:

The text specifies, "it undergoes multi-dimensional analysis, and classifies it into Medium, High, or Very High financial risk associated with it."

2) With reference to the habitat of the Asian Giant Softshell Turtle, consider the following statements:

- 1. It primarily inhabits fast-flowing mountain rivers.
- 2. It can also be found in coastal areas.

Which of the statements given above is/are correct?

- a. 1 only
- b. 2 only
- c. Both 1 and 2
- d. Neither 1 nor 2

Answer : b

Answer (b)

Explanation: The text states it mainly inhabits "inland, slow-moving, freshwater rivers, lakes, streams, and estuaries" and "also extends to coastal areas." It does not primarily inhabit fast-flowing mountain rivers.

3) The Irula Tribe's belief system is described as Pantheistic. This means they believe:

- a. In a single, all-powerful creator god.
- b. That god is in everything and everything is god.
- c. In multiple gods associated with specific natural phenomena.
- d. In the absence of any deity.

Answer : b

Answer : B

Explanation: That god is in everything and everything is god. Pantheism is the belief that God is identical with the universe, or that God is immanent in and co-extensive with the universe.

4) *Euthalia malaccana* has recently been confirmed in India. This species belongs to which broad category of fauna?

- a. Reptiles
- b. Amphibians
- c. Insects
- d. Fish

Answer : c

Answer C

Explanation: The provided text clearly states that *Euthalia malaccana* is a "butterfly," which falls under the broader category of insects.

What is the primary purpose of a "City Biodiversity Index" (CBI)?

- a. To rank cities based on their economic output.
- b. To assess the present status of a city in terms of native biodiversity, ecosystem services, and governance of biodiversity.
- c. To measure the number of recreational parks in a city.
- d. To evaluate the extent of urbanization in a city.

Answer : b

Answer: b)

Explanation: The text explains, "A city biodiversity index is prepared based on the present status of the city in terms of three large parameters — the extent of native biodiversity in the city, ecosystem services provided by them and the level of governance of biodiversity."
