

### **Daily Current Affairs Prelims Quiz 04-06-2025 (Online Prelims Test)**

1) Which of the following best describes the First-Person View (FPV) technology used in drones?

- It provides a virtual reality simulation of the drone's flight path without real-time visuals.
- It restricts the pilot's view to the drone's surroundings through a fixed ground-based camera.
- It allows the drone to autonomously navigate without pilot input using re-programmed routes.
- It enables the pilot to view real-time footage from a camera mounted on the drone, displayed on a screen or goggles.

Answer : d

### **First-Person View**

- First-Person View (FPV) technology allows a drone pilot to see real-time footage captured by a camera attached to the drone's body, typically displayed on goggles, a headset, or a monitor.
- It enhances navigation and control for applications like aerial photography, environmental monitoring, or drone racing, as per the provided content and web results.
