

Daily Current Affairs Prelims Quiz 26-11-2025 (Online Prelims Test)

1) Consider the following statements about **Comptroller and Auditor General of India (CAG)**

1. Article 147 provides for an independent office of the CAG.
2. He is appointed and removed by the president of India alone.
3. He is eligible for the reappointment.

Select the *incorrect* statements using the code below:

- a. Only one
- b. Only two
- c. All three
- d. None

Answer : c

Explanation

- **Statement 1 is incorrect** - Article 148 provides for an independent office of the CAG.
- **Statement 2 is incorrect** - CAG can be removed in the same manner as a judge of the Supreme Court of India.
- He can be removed by the **President** based on a resolution passed to that effect by both the Houses of **Parliament with special majority**.
- **Statement 3 is incorrect** - He is **not eligible for further office**, either under the Government of India or of any State.

2) The term “**Auramine**” recently seen in news is?

- a. A dormant volcano
- b. A banned hazardous dye used as food additive.
- c. Nuclear submarine
- d. Malware used in cyberattacks.

Answer : b

Explanation

- **Option b is the correct answer.**
- **Auramine O** is a synthetic yellow dye, produced from compounds such as dimethylaniline and formaldehyde.
- The dye appears as yellow flakes or powder and dissolves easily when mixed with solvents.
- It is used in industry, including textile and leather processing, printing inks, paper manufacturing, etc.

- It is bright in colour, easily available and low-cost, yet remains **banned for use as a food additive**.

3) Hayli Gubbi volcano recently seen in news located at?

- a. Ethiopia
- b. Eritrea
- c. Kenya
- d. Tanzania

Answer : a

Explanation

- **Option a is the correct answer.**
- ***Ethiopia's Hayli Gubbi volcano*** has erupted for the first time in 12,000 years, and the volcanic ash is likely to have recently entered the western and northern parts of India.
- It is a long dormant volcano in the remote Danakil Depression of the Afar Rift. It is situated in an area of intense geological activity where the African and Arabian tectonic plates meet.
- High-level winds carried the ash cloud from Ethiopia across the Red Sea to Yemen and Oman and further over the Arabian Sea towards India.

4) The **Beta Attenuation Monitors (BAM)** method used in the process of?

- a. Monitoring temperature changes in hilly areas.
- b. Measuring airborne particulate matter (PM) concentrations.
- c. Finding uranium enrichment percentage.
- d. Detecting the speed of super computer performances.

Answer : b

Explanation

- The **Beta Attenuation Monitor (BAM)** method is used in the process of measuring airborne particulate matter (PM) concentrations, particularly for PM2.5 and PM10.
- It works by continuously measuring the mass of particles collected on a filter tape, using the principle of how beta radiation is absorbed by the deposited particles to calculate their mass concentration in real-time.
- The Supreme Court recently asked authorities to explain the equipment used in Delhi air-quality monitoring stations and whether it is suited to the city's conditions.

5) Consider the following statements

1. The third Judges Case established that the senior-most Supreme Court judge must be appointed as Chief Justice of India (CJI).
2. CJI is appointed by the President under Article 124(2).

Select the correct statements using the code below:

- a. 1 only
- b. 2 only
- c. Both 1 and 2

d. Neither 1 nor 2

Answer : b

Explanation

- **Statement 1 is incorrect** - The **Second Judges Case** (1993) established that the senior-most Supreme Court judge must be appointed as CJI.
- **Statement 2 is correct** - **Article 124(2)**, Supreme Court judges are appointed by the President on the advice of the Collegium (CJI + 4 senior-most judges).
