

Q. India has pitched itself as a country that has effectively used technology to develop and deliver governance solutions at a mass scale. In this context, analyze how building a Sovereign AI can help enhance various sectors. (250 W)

Yes! India have proved her prowess in harnessing Governance-Solutions by using Technology. The well-known example one could give is AADHAAR & UNIFIED PAYMENT INTERFACE.

Now, This techy intervention jumps to it's next stage by wishing to create a 'Sovereign AI' for our Nation.

→ This means that we want to have a own AI ECOSYSTEM, rather than depending on Big-Tech giants like Meta and Google.

→ This will helpful in promoting various sectors like Healthcare, Agriculture and Governance ... etc.

APPLICATIONS :-

- * **POLITICAL** - This protects India's Sovereignty and Integrity through its non-dependence nature.
- * **ECONOMICAL** - Ministries can reap ^{Profit} by selling non-personal datas, as suggested by Krish Gopala Krishnan Committee appointed by MeitY.
- * **SOCIAL** - Build Confidence among people.
- * **TECHNOLOGICAL** - Will make India pioneer the era of AI and promote researches & Investments.
- * **LEGAL** - It Gives a better vision & Interpretation to already existing & upcoming laws.

⇒ The focus on practical AI applications, Combined with balanced regulatory approach, aims to foster innovation, ensure effective data governance and drive economic growth.
