

Q. Discuss how Delhi Declaration adopted recently during the Global Partnership on Artificial Intelligence (AI) Summit found middle path between promotion and regulation of AI.
(250W)

An alliance of 29 members adopted the 'Delhi Declaration' of Global Partnership on Artificial Intelligence (GPAI) Summit in 2023. It promulgated to promote and regulate AI for the betterment of the world community.

ARTIFICIAL INTELLIGENCE

- It is the ability of the computer to think as same as Human-Being.
- Examples :- Machine Learning, Robotics, Chatbots...etc.
- Use :- Multi-Dimensional & Multi-Sectoral

DELHI DECLARATION'S PROMOTION

- AI is a tool inherently beneficial for the man-kind
- AI's application on Agriculture is the thematic area of development.

- It brings Economic benefits
- Innovations & Job creations is one of the outcomes of using AI.
- It is sustainable & Trustworthy.

DELHI DECLARATION'S REGULATION

- AI should be used responsibly and respect dignity of others.
- AI have some ethical risks & associated harms.
- Ministry of ^{Electronics,} Information and Technology (MeitY) And Telecom Regulatory Authority of India (TRAI) have asserted ^{the} importance of Statutory backing of AI.
- Guides us to 'responsible use' of AI.

⇒ Unlike Bletchley Declaration, The ^{Delhi} New Declaration takes a ideal path of harnessing and regulating the AI.
