

Q1 Do you think that the Government of India should re-establish its role as a principal employment generator? Comment.

Solⁿ No, Time has changed.

Earlier in recent times, Govt ~~was~~ the main employer. But now Govt sector doesn't have the full-fledge capacity to generate jobs for people.

Figures on Unemployment Rate

* According to last Periodic Labour Force Survey 2018, (PLFS)

Unemployment Rate \rightarrow 4.7%

* But According to Centre for Monitoring Indian Economy (CMIE),

Current unemployment rate is 7.6%

Twist In Figures :-

"People aged between 15-29 years who are unemployed currently stood at 24.19%"

— CMIE Report

Govt has to Regulate & Boost the Private sector for inclusive growth including Employment Generation.

~~xxx~~ Public-Private Partnership Model :-

Govt is going with infinite no. of PPP projects which is seeming successful

e.g. -> Delhi Metro — Delhi Govt
— Central Govt
— Private Agency

Note :- Govt Indirectly or solely has the Prime duty for generating employment which is actually a sustainable development goal (SDG) of United Nations Programme, that India has sign.
