

6/3  
The Aspirational District Program launched in 2018 with an aim of developing the underdeveloped district of total 112 in 26 states and 1 union territories has come with applaudable achievement.

A study made by professors of Harvard and MIT has reported that these districts has made significant improvement in health, science and Infrastructure.

Salient features :

Issues addressed : Unutilising the government fund and not-recognising these districts were the key problems of poor governance. These issues has been addressed.

Three C's

- i) Convergence : The schemes were made by experts in different sectors based on the region.
- ii) Coordination : These schemes were rolled out with the co-operation of central prabharic state prabharic and district administration.

~~officers~~  
empeletion: These districts were ranked based on the 41 key specific indicators monthly and the districts scored well can access funds from NITI Aayog.

updatation ∴ A web based portal was launched and updated with cloud mechanism, machine learning for addressing grievances.

ADP has provided better laboratories, hygienic toilets for granting better education for students.

Wide coverage ∴ ADP has also covered regions with rough terrain North-east state and also the areas with left-wing extremism.

The other districts in the uncovered states can use these methods and provide a head start for the aspirational journey of their districts.
