

- Q. Recently, Telecom Regulatory Authority of India has floated a consultation paper on calling Name Presentation (CNAP). What do you understand by the term CNAP and write about its purposes?
- ↳ Recently Telecom Regulatory Authority of India (TRAI) has proposed the introduction of calling Name Representation (CNAP).
- ↳ Calling Name Presentation
↳ It provides the called individual with information about the calling Party (similar to True caller of Bharat calling ID and Anti-spam).
- ↳ Idea is to ensure that telephone subscribers are able to make an informed choice about incoming calls and curb harassment by unknown or spam callers.
- ↳ Purpose
↳ Existing technologies present the number of the calling entity on the potential receiver's handset.
↳ Since subscribers are not given the name and identity of the caller, they sometimes choose not to answer them believing it could be unsolicited commercial communication from unregistered telemarketers.

- ↳ Challenges.
 - ↳ latency → Slight increase in the time taken to setup a call.
 - ↳ the responsiveness might also suffer when moving from a faster wireless network (4G or 5G) to a comparatively slower one (2G or 3G)
- ↳ Privacy
 - ↳ It is not particularly clear how the CNAP mechanism would balance the caller's right to remain anonymous, an essential component of the right to Privacy.
 - ↳ An individual may opt to remain anonymous for multiple reasons eg. whistle blowers
 - ↳ would be developed along those lines rather than asking a centralized database operated by a third party to host and share data.
- ↳ Way Forward
 - ↳ The interface should be user friendly with an effective mechanism. Active participation from the subscribers would ensure that spammers are rightly identified and are unable to make further calls.
 - ↳ Government must also invest in digital literacy, skilling citizens to navigate and use the tech better.
