

In various ways, India's digital diplomacy can influence the emerging economies across the world analyse (100 words).

India has become the pioneer in digital public goods which ensures transparency ease of usage and speedy mechanism which helps markets, public and government to interact with each other

India's Digital Track & It's use in digital diplomacy

With the penetration of internet at comparatively low cost comparing to other nations India has better edge in digital way of diplomacy.

Eg: India Stack and Aadhaar are important tools which shows the drastic high speed digital development in India

With Aadhaar and India Stack Government has removed major flaws in government policies to provide better service

Eg: (1) Direct Benefit Transfer to beneficiaries which has reduced corruption

(2) Fraudulent beneficiaries have been weeded out.

How this will effect India's digital diplomacy?

India being a youngest democracy has shown world a rapid digital development

(1) We could help the developing nations like Uruguay, Kenya, Uganda, Kazakhstan etc to use Digital public goods. This will help them to remove the inefficiencies.

Eg: Education playing major role in development of nation "Diksha" platform

could be useful which is serving already 500 million students

- (2) By introducing digital payment goods like UPI it will ensure effective and efficient transactions and prevent corruption
- (3) By supporting the administration with e-Governance websites like MyGov.in, e-seva etc could ensure government services to the hands of people.
- (4) Above all we could counter the belt and road initiative of China in a much lower cost and in a effective way.

Technology growing day by day and increasing usage of technology by people will ensure a stable diplomatic relation with developing nation.
