

2)

Lessons for India from the Taiwan:-

Taiwan is <sup>one of</sup> the strongest military & economic powers in the world.

Recently, Ms. Pelosi <sup>of US</sup> visited Taiwan against the stern warnings issued by China.

India's policy of ~~to~~ meeting Chinese leaders is a flawed one.

Because China continues to violate the Line of Actual Control (LAC) norms in the border.

India should make decisions strongly among AUKUS (US, Australia, Japan, India) which is the strong objections against China.

India should make the economic relationship as a two-way process not in favour of China's trading.

Taiwan china is the Taiwan's largest partner on the other hand china is dependent on the semi-conductors produced in Taiwan in a large scale.

India too has the potential to get a good  $\phi$  economic interdependence trading with china but not with the hands of china.

Finally, India should be more pragmatic in approach after learning lessons from Pelosi's visit to Taiwan
