Discuss the ~~benefits~~ significant benefits that India can accrue from Indigenous manned Space mission

BENEFITS OF INDIAN MANNED SPACE MISSION:

1) India will be the 4th Country in world if it is successful in this mission. This step would eventually increase India's bargaining power in bilateral and Multilateral dealings.

2) In order to carryout manned mission by ISRO requires higher payload carrying technology. which inturn will pave the way for advance technology developments and adds more weight to do commercial business.

3) China is one among the countries which have conducted successful manned mission to outer space. And India needs to have a strategical balance in Asia. The success in the mission will help India in achieving this target.

4) It will encourage the younger generation to join ISRO and work towards the development of science and space technology

5) It will help the country to secure the space domain because in the near future outer space may have an impact on internal security.

6) It will also Increase the standard of higher education in Aeronautical Engineering, Aerospace Engineering and physics domain.

The benefits outweigh the cost hence it is a necessity. This will open more commercial and scientific opportunity and also a place in a group of very few countries which has achieved this target.
