

1. For a clean environment, the practice of conservation as a culture needs to be constructed in the minds of people. Analyse.

The Indian environment due to wide usage of recyclable and non-recyclable matters / things and its unscientific way of disposal by general public and institution is leading to environmental crisis. The practice of conservation of environment in the behavioural change of people is the need of hour to make world a safe planet to live.

Flow chart explanation:

1. Environment is affected by pollution by unscientific ways & means of disposal of gabbages.
2. Polluting air, water, soil without reducing it.
3. Thus it need behavioural awareness and change which is a practice of conservation of culture.
4. (e.g) Practice of conservation made Odisha Bhubaneswar beaches as Blue Flag Certified.

## 1. Should start at home:

1. Garbage not disposed at public places
2. Reduces diseases due to pathogen and vectors
3. Thus people awareness creates a culture of sanitation
4. (e.g) Indore - Ranks 1<sup>st</sup> at Swachh Bharat  
Clean city due to people culture start from home

## 2. Conservation as a momentum for officials/organisation:

1. City authority - frequent awareness generation
2. Cleaning city - make people to change behaviour
3. (e.g) Kozhikode - city administration creates demo & programs about culture of conservation

## 3. Industries should try to conserve nature:

1. Fines & ban don't provide unnecessary help under the industries starts to think about nature
2. Thus soil & water and air pollution reduces.
3. (e.g) NTPC - Tamil Nadu is pioneer is using scientific methods of disposal of fly ash, Sulphur which acts as conservation as culture

## 4. Inculcate in the minds of children:

1. Programms and practical works should be given rather than in text books.
2. Young minds - creation of conservation as culture
3. Jammu & Kashmir - Valley children has monthly sanitation programms to have a change.  
Environment will benefit only when it is saved, hence people had to change.
