

18/08/2018

To get good nutrition to all, India needs delivery models that are collaborative across the domains. Analyse.

PRESENT PROBLEMS:

1) The different Schemes Implemented by government like Integrated child development Services, Mid-day meals scheme, National Nutrition Strategy and National Nutrition Mission has recognised that it has to work collaboratively across ministries but it does not mention about the role of Private Sector and Civil Society.

2) At present there is an need for new models for structural and Systemic Issues and there is no Initiative for the Same.

NEED FOR COLLABORATIVE DELIVERY MODELS

To Create efficient Supply chain to address poor nutrition in India especially among children, adolescent girls and women.

MEASURES TO BE TAKEN:

1) To Integrate the capacity of programmes Such as ICDS, MDM, and NNM

2) Both State and Central government need to have common goals and metrics for Improving the Situation

3) To device metrics that are easy to measure and to real time tracking Mechanism.

4) To Introduce public- private partnership which could act as a Catalyst.

5) To mandate and Scale food fortification in edible oil, wheat, rice and dairy products.
