प्रश्न संख्या  
(Question No.)

5. How the education can be used a tool to  
mitigate the impact of climate change?  
Explain.

Climate change and its current and forthcoming impact is talk of the town due to mitigation and adaptation strategies discussion.

Education is the most watched to curb climate change which has been used for effective and long term climate mitigation as given in following ways.

(1) By creating climate resilient education curricula which will foster sensitivity for climate

(2) By creating nature based economy

eg: TRIFED in tribal areas  
to encourage tribal entrepreneurship  
- keship

(3) Promoting universal values such as global citizenry and sustainable development must be incorporated into mainstream study

eg: young leaders like.

Malala, Greta Thunberg and Aishwarya  
inspires millions.

(4) More investment and better quality of expenditure in education to scale up learning for disadvantaged group like girls and women to support sustainable development.

(5) Education can be more responsive in producing experts, innovators and leaders to tackle climate change.

then by developing the climate change education system. the global community can achieve long term mitigation trajectory.
