Q<sup>o</sup>

Online gaming in india has the potential to be a multi billion dollar industry, but it comes with -ve fallouts as well. Discuss (15 marks).

The new emerging technologies like AI, IoT, data science are impacting our lives in both positive and negative sense.

And one of the key implication to it is Online Gaming that has increased drastically.

Positive points: ↓

(1) Online Gaming industry is expected to provide economic benefits like income, revenues.

(2) It is also creating jobs in service sectors especially.

③ it has potential to attract significant Global investment in our country.

④ it has also developed - Early learning skills for youngsters.

### Rollout in Online Gaming :

- ① As online Gaming is increasing, and as Online Gaming is also at peak.
- ② Hence, no. of crimes and suicides are also increasing regarding to Online platforms.
- ③ It is negatively affecting the child's behaviour and psyche as they are being more aggressive and introvert.
- ④ As students, children are getting addicted to them, hence having health issues, eye problems and affecting their future.

Recently, the provisions regarding to Online Gaming are been introduced. Hence ~~might~~ have some regulated provisions might help.

### Way Forward

- Effective policies should be introduced and properly implemented.
- Inculcate the best Global practices, as in other countries, online Gaming is properly regulated.
- Introducing of Grievance redressal mechanism is an need of an hour.
- Stakeholders should be consulted before bringing any provisions in practise.

Hence, Online Gaming is in much better place if the IT Rules 2022 are properly implemented.
