

2 Do you think that Russia should create conditions for
2 constructive dialogue with Ukraine? Comment.

The Russia Ukraine crisis creates new
spillover effect all over the world. The bombing
on Poland killed two soldiers could have gone
worse. Russia can create amicable conditions
for a dialogue with Ukraine.

Worth of war

War took 6500 plus lives of Ukrainians
and close to \$1-3 trillion slump in global
GDP. The war has also risked the food
security to many worlds. Ukraine supplied
India with sunflower oil and fertiliser.

It resulted in increase in food inflation
to 8.6% in India. The oil markets have cut
supply increasing the retail prices and
widening current account deficit.

Worries from the west

The missile attack on Poland which is

a NATO member can be a reason to launch a collective attack on Russia. Already terrorism are mounting in Kurdistan region, Yemen and Ethiopian Tigray. A latest war caused by Russia can drag the world towards misery.

Constructive dialogue

US and Russia must start negotiating on Intermediate range nuclear forces treaty which is stalled and recently Russia halted US inspection of war heads under NEW-Strategic Arms Reduction Treaty (NEW-START)

Russia can take back troops and refrain from aggression. Multi lateral forums such as Shanghai co-operation Organisation and UN Security Council can broker this with India at a central role.

This era is not the era of war as used by India must be rightly practised by Russia through peaceful measures.
