

The U.S has recently unveiled its plan to have a "Space Force" as a sixth branch of the American armed forces. Discuss its Impact globally and nationally?

GLOBAL IMPACT :

In this regard the world countries had agreed up on the "Prevention of Arms Race in outer Space" treaty by the UN. According to it weaponisation of the Space is not allowed. In this connection the action taken by the united states for establishing a special branch in American armed force specifically for Space poses a threat to the other nations in the Space domain. The use of Space for military purpose has increased in recent years.

In order to remain as the leading nation in the Space domain U.S has taken this step. And this may intimidate the other nations to pursue the same kind of goal which may lead to the Violation of "POAROS".

NATIONAL IMPACT!

In this regard India has proved itself as a fast growing nation in the field of Space. And Beijing has more advanced technologies than India may pose a threat if it reacts to the US action. Thus India may have to come out with an official white paper in this regard.

In Future this may lead to "Space war" and in order to prevent this a global "Space Police" may be set up in the UN by making certain Amendments in the prevention of Arms Race in outer Space.
