

1. Tangible outcomes from Convention on biological diversity are a long time away. Do you agree with this view? comment.

In a UN framework convention on climate change (COP 27) in Egypt, will discuss in the conference to save the planet and Biodiversity and also Rio summit of 1992 are also the origin of Biodiversity conservation

Biodiversity losses for longtime

In world biodiversity will loss in day by day, In severe cyclone storms, and melting of glaciers and sudden temperature we will face the some extinction of Biodiversity. In UN survey estimated 34,000 plant and 5,200 animal species

Including one in eight of the world population biodiversity will extinct and many animals are high risk of extinction.

Biodiversity conservation steps :

Like a COP 27, UN conventional groups are take some steps to conserve biodiversity, they should increase the forest cover and also should decrease the pollution to cause sudden temp change

Way forward :

* India adopting negotiatory track from different nations have different responsibility to conserve the biodiversity species.

* UN frame work should take steps to conserve biodiversity and extinct species
