

INDIA'S PLACE IN PUBLIC DEBT:-

With high indebtedness India's ranking after Brazil & Argentina has been emerging as the growing economies.

RISK ASSOCIATED WITH PUBLIC DEBT:

With high public debt, the risk of high interest rates are also associated which reduces the private investments to lower.

MEASURES THAT CAN BE ADOPTED:-

* Public Private Participation is one such measure which can support the economy

* Recently Indian Monetisation pipeline is one such good example for privatising the public infrastructure.

* ~~Low~~ Low performing / loss making PSU can be privatised

* Harmonising GST can lead to low tax GDP ratio. Increase more GDP which trend set the growth of economy

* Tourism can also be encouraged.
Eg:- Recent measures of providing
visa facilities to boost
tourism sector.

* Shifting to more renewable
source of energy. Eg:- They
have attracted FDI's such
as Denmark, US

* Usage of agri waste to
produce reliable biofuels

* Nation Plans like National Plan
on oil seeds can boost GDP.

* Guarantee scheme in the telecom
sector can also
be seen with future goals
of economy development
digitalisation.

* Involvement of more green bonds
can also facilitate the
growth but requires to
overcome much more challenges
associated with it.

CONCLUSION :- With efficient, robust
planning & shifting towards
