

Though the threat of insurgency has reduced in the country, but its potency in some areas still exists. Analyse.

Government stated that the threat of insurgency has reduced from 96 districts in 10 states in 2010 to just 41 now.

### Reason for reduction in insurgency:

- \* various Government policies that led to improvement of economy of the people.
- \* Stricter actions taken by Enforcement Directorate in money laundering cases.
- \* Increase in the number of educated people (comparatively with 2010).

Still in 41 districts and in parts of Assam the potency exists.

### Reasons for existence

- \* Funding (Money laundering) from China to the Maoists
- \* No feel of oneness to the nation.
- \* Failure to reach every village/area due to geographical factors.

### Way forward

- > Increase the expansion welfare measures.
- > Concentrate on infrastructure building
- > Empower local tribal people & social activists
- > Use technology like smart sensors, drone to monitor the area.
- > Increase efficiency & training of Anti-Insurgent Security force.

By these measures & even more innovative policies, the presence of insurgent groups can be curtailed or better removed.
